## Communicate with Confidence

ARC™ communication protocol by Rollease Acmeda ensures Automate motorised shades are reliable, expansive, and easy to use... paving the way for the window coverings of tomorrow's smart home.

CLEVER COMMUNICATION

Automate Motorisation utilises a new Radio Frequency platform called Automate Radio Communication - ARC. The ARC communication protocol utilises a 433mHz radio frequency, well known for strong, reliable communication in the connected home devices space.

Automate ARC protocol also features bi-directional communications which empowers users and connected systems to experience shade control like never before.

Voice Controlled Systems

Now with Acmedas new "Pulse System" incorporating the intelligent app controlling your automate shades is now more convenient than ever before, with the new intelligent home assistant Alexa by Amazon, HomePod by Apple and Google Home.

Automate Awning Sensors

Our solar powered wind, sun & rain sensor will naturally react to the elements to automatically open or close your awning, so you don't have to.

An intuitive motion sensor detects sudden movement and automatically goes into protection mode closing the awning.

Automate Paradigm+ Remote

Paradigm+ remote controls offer modern features including LCD displays, individual, group and ALL control and recision levelling, giving users complete control from an elegant hand held remote. Available in single or 15 channels.
