

Cellular Blinds / Panel Glides

Cellular blinds are a versatile energy saving window furnishing with insulating properties, designed to control temperature without compromising style.

Easy to operate, either by a cord & chain or spring, cellular blinds are available in a range of colours and patterns. They are also available in light filtering and blackout materials, with either single or double cell honey comb layers – this makes them an excellent choice when insulating your home. Cellular blinds can work with all different sizes and shapes of windows and can have the top down and bottom up, standard cord control, spring operated or cord lock, & day/night applications.

Key Features and Benefits

- Fashionable and energy efficient
- Suits any shape or sized window
- Available in a wide range of colours
- Superior insulating qualities
- Available in light filtering, block out and sunscreen fabrics
- Available in single or double 'honeycomb'

Panel Glides

For a fresh, innovative way to furnish your windows then consider panel glides for a sophisticated alternative.

Panel glides are designed for versatility and perfectly suit sliding doors and windows, and can act as room dividers. Available in block out and translucent fabrics designed to achieve privacy or to assist in light control.

When designed with larger panels, this practical system creates an effective stylish approach to furnishing your windows or room.

Sheer Elegance

Sheer Elegance blinds combines the elegant light diffusion of sheer fabric with the stylish practicality of a privacy blind. The contemporary bold horizontal stripes effortlessly move from transparency to dim out.

Sheer Elegance can be adjusted sensitively to provide immediate privacy or transparency, or the blinds can be fully retracted to provide a clear view to the outside.

This revolutionary window blind provides exceptional light control and comes in a striking selection of fabrics, including light filtering and block out fabrics, and in a choice of colours that will enhance any room setting. These blinds can also be motorised.

Key Features and Benefits

- A stylish approach to window dressing
- Available in block out or light filtering fabrics, for privacy or light control
- Can be used as a sophisticated room partition
