

Providing security against burglars and vandalism, whilst also protecting against extreme weather such as high winds and heavy rain, roller shutters really do ensure your home is kept as safe as possible. Available in cyclone and fire rated models.

Style wise, roller shutters are made from aluminium and come in a range of colours therefore can be made to blend in with the style of your home. In addition to keeping you safe they insulate your home from the heat and the cold.

You can choose to operate your roller shutters from inside your home, either manually or on a fully automated basis. This can be with a 12v battery or solar operated motors which is either hand remote controlled or wall switch controlled. Also available in 240v hard wired to your house.

Many people who choose to install roller shutters also experience a dramatic reduction in noise and light levels that filter into the home from outside resulting in a quieter home and deeper sleeps!
