

# Zip Screens

Australian life is known, and envied internationally for its focus on outdoor living with barbecues, verandahs, pool areas and pergolas all being the focus for family gatherings and meals with friends.

For the ultimate protection and privacy when entertaining outdoors, home owners can opt for the zipscreen system which shelters them from sunlight, wind, rain and insects in both Summer and Winter seasons.

With hidden interlocking parts, the zipscreen system has self-aligning side channels and each one is custom-made to give you the perfect fit. The zip system is inside the side channels and not visible.

Residential and commercial properties can both benefit from the zipscreen system which is strong, durable and comes with enclosed box covers and controls to suit your requirements.

## Key Features and Benefits

- The ultimate in protection and privacy
- Provides shelter from the sunlight, wind and rain
- Provides protection from insects
